# Roller are our strength

---

The **Rollex Group**, with its headquarter in Germany, produces roller for intralogistics.

Since 1973, the focus has been on the production of **driven and non-driven as well as conical roller, motor rollers and pressure-free system components**. In another business area, **gravity roller conveyors** for continuous and **slide-in bearings** as well as **roller rails** and **roller strips** are produced.

The combination of a high level of technical expertise, the use of modern machines and an extensive stock range enables us to offer optimal solutions for every application at short notice. In addition to standard roller, special solutions are also made to order.

With worldwide branches, three production sites in Germany and a production site in the Netherlands, the **Rollex Group** is now represented on the world markets and serves customers worldwide

Our motivated employees ensure satisfied customers and smooth processes
